CLAIM LISTING:

The claims currently pending read as follows:

-
1. (Original) A method of visually indicating transfer of data in response to a pointing device data transfer command comprising:
modifying a display position indicator on a display screen based on a data transfer command; and
animating data transfer on the display screen based on the data transfer command from a pointing device.
2. (Original) The method of claim 1 wherein the data transfer command is selected from a group consisting of cut, paste and copy.
- A¹ 3. (Original) The method of claim 1 wherein modifying the display position indicator in response to one of a cut or copy command comprises changing the display position indicator to a position indicator with a reduced object in an indicator bubble.
4. (Original) The method of claim 1 wherein animating data transfer in response to one of a cut or copy command comprises reducing a marked object to a reduced object and moving the reduced object through the display position indicator into an indicator bubble.
5. (Original) The method of claim 4 further comprising:
moving the marked object towards the display position indicator while the object is being reduced.

6. (Original) The method of claim 1 wherein modifying the display position indicator in response to a paste command comprises changing the display position indicator with a reduced object in an indicator bubble to a position indicator without a reduced object in an indicator bubble.

7. (Original) The method of claim 1 wherein animating data transfer in response to a paste command comprises moving a reduced object from an indicator bubble in the display position indicator through the display position indicator, expanding the reduced object, and inserting the expanded object into a location indicated by an insertion marker.

A 1
8. (Original) The method of claim 7 further comprising:
moving the expanding reduced object towards an insertion marker while the reduced object is expanded.

9. (Original) Computer usable medium including a program for visually indicating transfer of data in response to a pointing device data transfer command comprising:

computer readable code for modifying a display position indicator on a display screen based on a data transfer command; and

computer readable code for animating data transfer on the display screen based on the data transfer command from a pointing device.

10 (Original) The computer usable medium of claim 9 wherein the data transfer command is selected from a group consisting of cut, paste and copy.

11. (Original) The computer usable medium of claim 9 wherein modifying the display position indicator in response to one of a cut or copy command comprises changing the display position indicator to a position indicator with a reduced object in an indicator bubble.

12. (Original) The computer usable medium of claim 9 wherein animating data transfer in response to one of a cut or copy command comprises reducing a marked object to a reduced object and moving the reduced object through the display position indicator into an indicator bubble.

A1
13. (Original) The computer usable medium of claim 12 further comprising: moving the marked object towards the display position indicator while the object is being reduced.

14. (Original) The computer usable medium of claim 9 wherein modifying the display position indicator in response to a paste command comprises changing the display position indicator with a reduced object in an indicator bubble to a position indicator without a reduced object in an indicator bubble.

15. (Original) The computer usable medium of claim 9 wherein animating data transfer in response to a paste command comprises moving a reduced object from an indicator bubble in the display position indicator through the display position indicator, expanding the reduced object, and inserting the expanded object into a location indicated by a insertion marker.

16. (Original) The computer usable medium of claim 15 further comprising:
computer readable code for moving the expanding reduced object towards a insertion
marker while the reduced object is expanded.

A 17. (Original) A computer usable medium including a program for visually
indicating transfer of data in response to a pointing device data transfer command
comprising:
means for modifying a display position indicator on a display screen based on
a data transfer command; and
means for animating data transfer on the display screen based on the data
transfer command from a pointing device.
